Dataset Glossary

NOAA Weather Data – JFK Airport

Dataset Glossary

Feature	Description
STATION	Weather Station Number
STATION_NAME	Weather Station Name
ELEVATION	Weather Station Elevation
LATITUDE	Weather Station Latitude
LONGITUDE	Weather Station Longitude
DATE	Date (day of month given in two digits) and Time of observation
REPORTTPYE	Indicates type of weather observation
HOURLYSKYCONDITIONS	A report of each cloud layer (up to 3)
HOURLYVISIBILITY	The horizontal distance an object can be seen and identified given in whole miles. Note visibilities less than 3 miles are usually given in smaller increments (e.g. 2.5).
HOURLYPRSENTWEATHERTYPE	Weather types describe precipitation or obstructions to vision occurring at the time of observation. These are reported by automated sensors (AU or AW) and manually (MW) by human observation. AU elements are listed first and followed by "|" and followed by AW elements. After the AW elements there will be another "|" followed by the MW elements (e.g. "-RA:02|RA:61|RA:61"). In the preceding example -RA:02 is an AU element, RA:61 is an AW element and RA:61 is an MW element. Note that precipitation types often use "-" for light intensity or "+" for heavy intensity. If a precipitation type has no "-" or "+" it is considered to be moderate intensity. It is not uncommon for one type of element to be reported without another. In other words, it

Feature	Description
	is possible to have an AU element without an AW element or MW element.
HOURLYDRYBULBTEMPF	This is the dry-bulb temperature and is commonly used as the standard air temperature reported. It is given here in whole degrees Fahrenheit.
HOURLYDRYBULBTEMPC	This is the dry-bulb temperature and is commonly used as the standard air temperature reported. It is given here in tenths of a degree Celsius.
HOURLYWETBULBTEMPF	This is the wet-bulb temperature. It is given here in whole degrees Fahrenheit.
HOURLYWETBULBTEMPC	This is the wet-bulb temperature. It is given here in tenths of a degree Celsius.
HOURLYDewPointTempF	This is the dew point temperature. It is given here in whole degrees Fahrenheit.
HOURLYDewPointTempC	This is the dew point temperature. It is given here in tenths of a degree Celsius.
HOURLYRelativeHumidity	This is the relative humidity given to the nearest whole percentage.
HOURLYWindSpeed	Speed of the wind at the time of observation given in miles per hour (mph).
HOURLYWindDirection	Wind direction from true north using compass directions (e.g. 360 = true north, 180 = south, 270 =west, etc.). Note: A direction of “000” is given for calm winds.
HOURLYWindGustSpeed	Wind gusts occurring during time of observation. Given in miles per hour (mph).
HOURLYStationPressure	Atmospheric pressure observed at the station during the time of observation. Given in inches of Mercury (in Hg).
HOURLYPressureTendency	Pressure tendency (In general a 0 through 3 here indicates an increase in pressure over previous 3 hours and a 5 through 8 indicates a decrease over the previous 3 hours and 4 indicates no change during the previous 3 hours).

Feature	Description
HOURLYPressureChange	Difference in pressure over the past 3 hours. Prefixed with a “+” or “-” to indicate increase or decrease in pressure respectively. Given in inches of Mercury (in Hg).
HOURLYSeaLevelPressure	Sea level pressure given in inches of Mercury (in Hg).
HOURLYPrecip	Amount of precipitation in inches to hundredths over the past hour. For certain automated stations, precipitation will be reported at sub-hourly intervals (e.g. every 15 or 20 minutes) as an accumulated amount of all precipitation within the preceding hour. A “T” indicates a trace amount of precipitation.
HOURLYAltimeterSetting	Atmospheric pressure reduced to sea level using temperature profile of the “standard” atmosphere. Given in inches of Mercury (in Hg).
DAILYMaximumDryBulbTemp	Maximum temperature for the day (in whole degrees Fahrenheit). An asterisk (*) is used to designate when a daily maximum temperature is also the extreme maximum for the month.
DAILYMinimumDryBulbTemp	Minimum temperature for the day (in whole degrees Fahrenheit). An asterisk (*) is used to designate when a daily minimum temperature is also the extreme minimum for the month.
DAILYAverageDryBulbTemp	Average temperature for the day (in whole degrees Fahrenheit). This is based on the arithmetic average of the maximum and minimum temperature for the day.
DAILYDeptFromNormalAverageTemp	Average temperature’s departure from (1981-2010) normal temperature (in whole Fahrenheit degrees using “-” to indicate below normal)
DAILYAverageRelativeHumidity	Average daily relative humidity (in whole percent)
DAILYAverageDewPointTemp	Average daily dew point temperature (in whole degrees Fahrenheit)

Feature	Description
DAILYAverageWetBulbTemp	Average daily wet-bulb temperature (in whole degrees Fahrenheit)
DAILYHeatingDegreeDays	Heating degree days (in whole degrees using a 65 degree F base)
DAILYCoolingDegreeDays	Cooling degree days (in whole degrees using a 65 degree F base)
DAILYSunrise	Time of sunrise using a 24-hour clock (Local Standard Time – Daylight Savings Time is not used)
DAILYSunset	Time of sunset using a 24-hour clock (Local Standard Time – Daylight Savings Time is not used)
DAILYWeather	Daily occurrences of weather types. The 2-digit number in each designation corresponds to the WT (weather type code) used in GHCN-Daily dataset.
DAILYPrecip	Water equivalent amount of precipitation for the day (in inches to hundredths). This is all types of precipitation (melted and frozen). T indicates trace amount of precipitation. If left blank, precipitation amount is unreported.
DAILYSnowfall	Daily amount of snowfall (in inches to the tenths). T indicates trace amount.
DAILYSnowDepth	Daily reading of snow on ground (in whole inches). T indicates trace amount.
DAILYAverageStationPressure	Daily average station pressure (in inches of mercury, to hundredths)
DAILYAverageSeaLevelPressure	Daily average sea level pressure (in inches of mercury, to hundredths)
DAILYAverageWindSpeed	Daily average wind speed in miles per hour miles per hour, to tenths)
DAILYPeakWindSpeed	Peak wind speed for the day (in whole miles per hour)
PeakWindDirection	Direction of wind during peak wind speed for the day given as direction from which wind was blowing using a 360 degree compass

Feature	Description
	with respect to true north (e.g north = 360, south = 180, etc.)
DAILYSustainedWindSpeed	Maximum sustained wind speed for the day (in whole miles per hour). Note: For U.S. locations this is the fastest reported speed for the day that is sustained for at least 2 minutes for years 1994 and later. For earlier years it is the fastest reported speed sustained for at least 1 minute.
DAILYSustainedWindDirection	Direction of wind during maximum sustained wind speed for the day given as direction from which wind was blowing using a 360 degree compass with respect to true north"
MonthlyMaximumTemp	Maximum temperature for the month (in whole degrees Fahrenheit).
MonthlyMinimumTemp	Minimum temperature for the month (in whole degrees Fahrenheit).
MonthlyMeanTemp	Mean temperature for the month (in whole degrees Fahrenheit).
MonthlyAverageRH	Average monthly relative humidity (in whole percent)
MonthlyDewpointTemp	Monthly dew point temperature (in whole degrees Fahrenheit)
MonthlyWetBulbTemp	Monthly wet-bulb temperature (in whole degrees Fahrenheit)
MonthlyAvgHeatingDegreeDays	Average monthly heating degree days (in whole degrees using a 65 degree F base)
MonthlyAvgCoolingDegreeDays	Average monthly Cooling degree days (in whole degrees using a 65 degree F base)
MonthlyStationPressure	Monthly station pressure (in inches of mercury, to hundredths)
MonthlySeaLevelPressure	Monthly sea level pressure (in inches of mercury, to hundredths)
MonthlyAverageWindSpeed	Monthly average wind speed in miles per hour miles per hour, to tenths)
MonthlyTotalSnowfall	Monthly amount of snowfall (in inches to the tenths). T indicates trace amount.

Feature	Description
MonthlyDeptFromNormalMaximumTemp	Monthly departure from normal - maximum temperature
MonthlyDeptFromNormalMinimumTemp	Monthly departure from normal - minimum temperature
MonthlyDeptFromNormalAverageTemp	Monthly departure from normal - average temperature
MonthlyDeptFromNormalPrecip	Monthly departure from normal - precipitation
MonthlyTotalLiquidPrecip	Water equivalent amount of precipitation for the month (in inches to hundredths).
MonthlyGreatestPrecip	The month's greatest amount of precipitation to fall in 24 hours - precip value
MonthlyGreatestPrecipDate	The month's greatest amount of precipitation to fall in 24 hours - precip date
MonthlyGreatestSnowfall	24 hour greatest snowfall
MonthlyGreatestSnowfallDate	24 hour greatest snowfall - date
MonthlyGreatestSnowDepth	Highest snow depth - height
MonthlyGreatestSnowDepthDate	Highest snow depth - date
MonthlyDaysWithGT90Temp	Monthly totals temperature greater than 90 (departures from 1981-2010 normal)
MonthlyDaysWithLT32Temp	Monthly totals temperature less than 32 (departures from 1981-2010 normal)
MonthlyDaysWithGT32Temp	Monthly totals temperature greater than 32 (departures from 1981-2010 normal)
MonthlyDaysWithLT0Temp	Monthly totals temperature less than 0 (departures from 1981-2010 normal)
MonthlyDaysWithGT001Precip	Monthly totals precipitation greater than 0.01 (departures from 1981-2010 normal)
MonthlyDaysWithGT010Precip	Monthly totals precipitation greater than 0.10 (departures from 1981-2010 normal)
MonthlyDaysWithGT1Snow	Monthly totals snow greater than 1 (departures from 1981-2010 normal)
MonthlyMaxSeaLevelPressureValue	Monthly highest sea level pressure value
MonthlyMaxSeaLevelPressureDate	Monthly highest sea level pressure value date
MonthlyMaxSeaLevelPressureTime	Monthly highest sea level pressure value time

Feature	Description
MonthlyMinSeaLevelPressureValue	Monthly lowest sea level pressure value
MonthlyMinSeaLevelPressureDate	Monthly lowest sea level pressure value date
MonthlyMinSeaLevelPressureTime	Monthly lowest sea level pressure value time
MonthlyTotalHeatingDegreeDays	Monthly and season to-date totals for heating degree data
MonthlyTotalCoolingDegreeDays	Monthly and season to-date totals for cooling degree data
MonthlyDeptFromNormalHeatingDD	Monthly departure from normal heating degree data
MonthlyDeptFromNormalCoolingDD	Monthly departure from normal cooling degree data
MonthlyTotalSeasonToDateHeatingDD	Season-to-date totals for heating degree data
MonthlyTotalSeasonToDateCoolingDD	Season-to-date totals for cooling degree data
